

ORIENTED LIGHTWEIGHT 7LB. SAFETY FENCE SPECIFICATIONS:

Our lightweight fence has micro "cross welds" created during manufacturing that provide additional horizontal and vertical strength resulting in a product that is **up to 3 TIMES STRONGER** than competing products of the same weight. This greatly improves tear resistance and durability for superior performance! *Additional sizes and colors can be special ordered including green, black, blue and yellow!*

Type: 7lb Oriented

Standard Height: 122cm / 4ft (+-2%) (ICE-05)

Standard Lengths (standard): 30.5m / 100ft (ICE-05)

Standard Lengths (max): 32m / 105ft (ICE-05)

Weight Per Roll (standard): 3.2kg / 7b (ICE-05)

Weight Per Roll (min): 3.05kg / 6.7lb (ICE-05)

Weight Per Lineal Meter (standard): 105gr / 0.231 lb (ICE-05)

Weight Per Lineal Meter (standard): 100gr / 0.220 lb (ICE-05)

Tensile Strength (min) (MD=Machine Direction): 71kgf / 37.4 lbf (ASTM 639)

Tensile Strength (min) (TD=Transversal Direction): 8.8kgf / 19.36 lbf (ASTM 639)

Mesh Opening: 100mm x 45mm (3.94" x 1.77") +-5% (ICE-05)

Color: Orange/Green/Hi-Viz Yellow Green **UV Resistance:** 1 year

Pallet: 48 rolls per pallet

"Orienting" is a process during manufacturing that creates horizontal and vertical cross welds greatly improving the product's strength, tear resistance and durability allowing it to perform like a heavier product!

Up to 3x Stronger!

NOTE: Information here is proposed as a result of our experience based on real information obtained in a laboratory and does not provide warranty, implicit or explicit, of the results obtained by the user who in all cases needs to prove use of the product in their own plant to determine the application parameters according to his particular requirements of experience and process conditions.
